Compound method HYDROPROOF HT-SP+WF

HT-SP+WP-GS Ground granulated blast-furnace slage for concrete

CHEMIX HYDROPRO

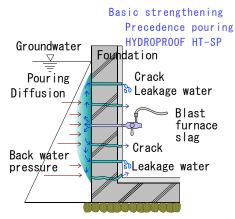

HYDROPROOF WP-GS Adhesion Ground granul urnace slage for

Waterproofing

HYDROPROOF HT-SP

Recovery and adhesion of the concrete which deteriorated by HYDROPROOF SP who did precedence pouring increase. Blast furnace slag system ultrafine particle pouring material's moves in the concrete back, flows out of a leakage-of-water part, and solidifies and unifies inside a crack. The construction range is completed by the same construction also in a place small also in a large place.
